

CONCORDANCE:

When to Use These Tables

Historically, when reporting the test scores of admitted students, some colleges have ignored the Writing section added to the SAT in 2005. As a result, a number of college planning resources display the old SAT total out of 1600 (Critical Reading + Math only) instead of 2400. For instance, *The U.S. News and World Report's University Rankings*, offers the 25th–75th percentile range of SAT total scores in the form of CR + M. If a student wants to see how her new total SAT score fits in with these reported ranges of old total scores, she can use the adjacent table.

On the second page of this document, we present two section concordances: old Math to new Math and old Critical Reading + Writing to new Evidence-Based Reading and Writing. These are useful for counselors and families who want to compare the reported ranges of colleges' old SAT section scores to a student's new SAT section scores.

To make this process simpler, Compass has produced a table that presents the concordances for reported scores of many popular colleges. Visit compassprep.com/profiles for more information.

To compare SAT scores to ACT scores, please visit compassprep.com/comparing-act-and-new-sat-scores for concordance tables and a comparison chart.
